PRYME™ Software App Services

Fully Integrated for the Tribal Government,
Casino and Gaming Commission

Our fully integrated Software App Services may be installed at one location but used by many, reducing the costs associated with multiple vendors and software systems being used throughout the tribal government.

Your personal and confidential data is secured, user access is privilege protected, and the savings add up, not to mention the efficiencies realized by going to one location for personnel data.

Applicant, employee and vendor self-service portals to communicate, access digital documents and upload various file formats

Workforce Management Software Apps

Workforce Management Software Apps

The Software Apps are configured based upon each client's desired outcomes for workflows, notifications, automations, merge documents and checklists used through the day to day operations of the business. An one-of-a-kind user experience is created by optimization.

Individual self-service portals for applicants and employees to access their applications, trainings, evaluations, licensure requirements, commonly used forms, in addition to uploading personal documents such as: PDFs, JPEGs, WordDocs, etc. required for employment and licensures.

Alert messaging, notifications and reminders are configured and used to manage an employee or employee group through their lifecycle and life events.

Incidents, Scheduling, Leaves, Licensing, Time and Attendance Software Apps

The fully integrated Software Apps may be used in cooperation with other departments to maintain visibility and compliance with various regulations. Obtaining and maintaining a complete 360 degree view of the employees lifecycle while a member of the team, in addition to incidents that may involve them upon their separation. All information collected is securely stored within the fully integrated solutions. Custom dashboards, reporting and auditing tools are all within the Software Apps.
